Research & Development Division	163	P-TOUCH tapes, king files, sticky notes Canon ink cartridge, etc.	3.2%	5,073	-	-
Company total	¥2,710		6.0%	¥45,371	¥1,397	8.8%

Discussion

We started to aggregate the data on purchase of environmentally compatible products from FY2020. They account for 6.0% of total company purchasing amount, and 8.8% when adding other environmentally friendly products.

Two plants and R&D Division include the consumables associated with production activities. The amount would be much less if we focus on paper products only. Approx. ¥1.4 million was spent on environmentally compatible products except for consumables, indicating the increased awareness to promote the purchase.

Towards next fiscal year

We will continue to purchase environmentally compatibles products mainly for office supplies including paper products and aggregate the data for reporting. Beyond paper products we will proactively purchase broader categories of environmentally compatible products.
